Catalogue 1 STAUFF Clamps

Germany

Walter Stauffenberg GmbH & Co. KG Im Ehrenfeld 4 58791 Werdohl

www.stauff.com

STAUFF products and services are globally available through wholly-owned subsidiaries and a tight network of authorised distributors and representatives in all major industrial regions of the world.

You can find detailed contact information on the last two pages of this product catalogue or at www.stauff.com/contact.

Please note: Unless otherwise stated, all data and figures in this product catalogue are approximate values and are only valid as references, which are not binding (also in respect to any third parties' rights of protection) and thus do not release the customer / user from checking and testing the suitability of the products for the foreseen purposes. Therefore, data and figures can only be used in a limited sense for construction purposes.

The application of the products is beyond the control possibilities of the manufacturer and, therefore, is exclusively subject to the responsibility of the customer / user.

In the event that a liability is nevertheless considered, any compensation will be limited to the value of the goods supplied by the manufacturer and used by the customer / user. As a matter of course, the manufacturer guarantees the perfect quality of all products in accordance with the General Terms and Conditions of Business and Sale.

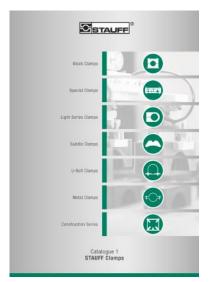

Subject to modifications due to the ongoing development and improvement of the products.

With the publication of this product catalogue, previous editions are no longer valid.

For more than 50 years, the companies of STAUFF Group have been developing, manufacturing and distributing pipework equipment and hydraulic components for mechanical and plant engineering and for service and industrial maintenance.

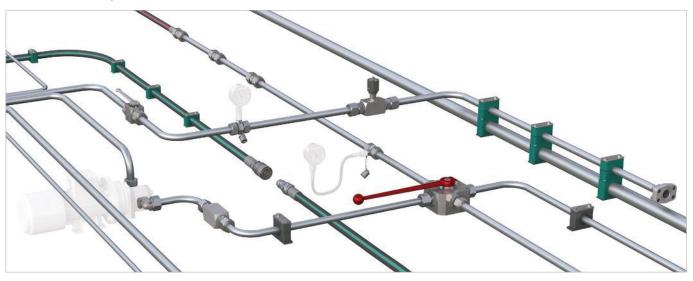

In addition to mobile and industrial hydraulic machinery, typical applications also include commercial and special purpose vehicles, rail transportation and energy technology. Likewise, STAUFF products are used in marine, oil and gas applications and in the process, food and chemical industries. The overall range currently includes about 50000 standard products as well as numerous special and system solutions according to customer's specifications or based on our in-house development.

All STAUFF products undergo relevant testing in accordance with international regulations and are governed by the high standards of the in-house quality management system. Furthermore, many items have received certifications and approvals from various international institutes, organisations and authorities who have independently confirmed the quality and performance of the products. Wholly-owned manufacturing, sales and service facilities in 18 countries and a tight global network of authorised distribution partners ensure high presence and service paired with a maximum of availability.

Quality Management – ISO 9001:2015 Environmental Management – ISO 14001:2015 Safety Management – ISO 45001:2018 Energy Management – ISO 50001:2018

STAUFF LINE Components

With the seven dedicated STAUFF Line product groups

- STAUFF Clamps
- STAUFF Connect
- STAUFF Flanges
- STAUFF Hose Connectors
- STAUFF Quick Release Couplings
- STAUFF Valves
- STAULT Valve
 STAULT Valve

from own, in-house development and manufacturing, the companies of the STAUFF Group provide a comprehensive range of components for fastening and connecting pipes, tubes and hoses for mobile and industrial hydraulic applications and many other industries.

The portfolio is completed by components for shutting-off, regulating, throttling and measuring fluid media.

In order to perfectly match each other, STAUFF Line products are designed and offered on a high, uniform level of quality. A large proportion of the range made from steel comes as standard with the premium STAUFF Zinc/Nickel surface coating, which is also optionally available for many of the other components.

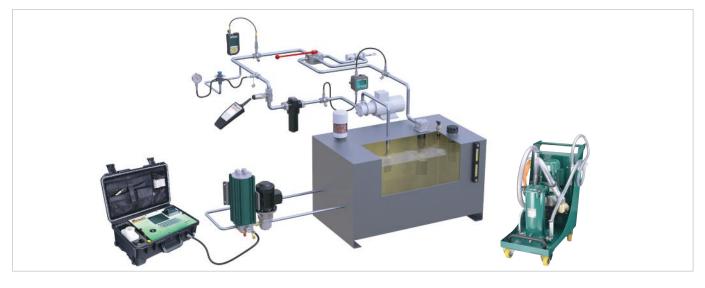

This coating offers the most reliable surface protection far beyond the previous market standards – even after transport, handling and assembly of the components – and meets all current legal requirements.

If desired, Original Equipment Manufacturers can be supported with value-added services, from **technical consultation** to **pre-assembly, assembly and kitting** as well as **logistics services**:

- Support with the selection of suitable standard components and ordering options; provision of customised solutions according to customer's specifications or based on our in-house development – from prototyping to large scale production
- Analysis and optimization of existing and design and developments of new systems aimed at increasing the efficiency and performance of machines and equipment and creating value for customers by reducing the total cost
- Pre-assembly, assembly and kitting of individual components to customer-specific system modules
- Individually coordinated procurement solutions (e.g. web shop and electronic data interchange) and supply models (e.g. from warehousing of customised components to Kanban logistics and just-in-time delivery of pre-fabricated system modules to the assembly lines of the customers) aimed at optimising material flows

Aligned with the needs of the market, the product groups

- STAUFF Test
- STAUFF Diagtronics
- STAUFF Filtration Technology
- STAUFF Hydraulic Accessories

include a comprehensive range of analogue and digital measuring equipment and devices, filtration systems and replacement filter elements as well as accessories for the construction of tanks, reservoirs, power packs and gear boxes in mobile and industrial hydraulics. The offer is completed by relevant value-added services:

- Support with the selection of suitable components and ordering options; provision of customised solutions according to customer's specifications or based on our in-house development – from prototyping to large scale production
- Analysis of existing hydraulic circuits aimed at filtration systems, tank components and monitoring devices that perfectly match to the specific requirements, and developing integrated concepts to increase the efficiency and performance of machines and equipment
- Individually coordinated procurement solutions and supply models

STAUFF Clamps

For more than 50 years, STAUFF Clamps symbolise quick and easy as well as secure installation of pipes, tubes, hoses, cables and other flexible and rigid components with outside diameters up to 1016 mm / 40.00 inch.

Their vibration and noise reducing features are appreciated as being an important contribution to environmental protection and occupational health and safety.

The processing of fire-proof clamp body materials, tested and approved according to several international fire-protection standards (such as BS 6853, EN 45545-2, UL 94) is only one of the many particular strengths of STAUFF.

STAUFF guarantees prompt service, even for customised solutions according to customer's specifications or based on our in-house development. For selected types and series, independent certificates and approvals can be provided:

- American Bureau of Shipping
- Bureau Veritas
- Department of the Navy, New York
- Germanischer Lloyd
- Lloyd's Register of Shipping
- Registro Italiano Navale
- Technischer ÜberwachungsvereinUnited States Coast Guard

For the finishing of the range of pipe, tube, hose and cable clamps as well as metal hardware in carbon steel, STAUFF relies on the STAUFF Zinc/Nickel surface coating which has proven successful for many years. It provides reliable surface protection – even after transport, handling and assembly – and meets all current legal requirements.

Versions in stainless steel V2A and V4A are generally available from stock. Alternative materials and surfaces are available on request.

STAUFF Zinc/Nickel Coating

Layers Sealing

Passivation Zinc/Nickel Steel

With at least 1200 hours resistance against red rust, the STAUFF Zinc/Nickel surface coating offers excellent surface protection – even after transport, handling and assembly. This was confirmed by testing in the salt-spray chamber according to DIN EN ISO 9227.

Users across all industries and applications benefit from sophisticated technology, which has been developed for and used by the very demanding automotive industry for many years now and that is already the proven standard for a large proportion of STAUFF components since 2007.

- At least 1200 hours resistance to red rust / base metal corrosion under practical conditions in the salt-spray chamber according to DIN EN ISO 9227
- · White rust occurs only by way of a slight grey haze
- Surpassing the requirements of the corrosion protection class K5 as defined by the VDMA, the German Engineering Association (360 hours resistance to white rust / 720 hours resistance to red rust)
- Free of hexavalent chrome Cr(VI)
- ELV compliant according to 2000/53/EC (End of Life Vehicles Directive)
- REACH compliant according to 1907/2006/EC (Registration, Evaluation, Authorisation and Restriction of Chemicals)
- RoHS compliant according to 2002/95/EC (Restrictions of the Use of Hazardous Substances)

- Appealing colour scheme with a bright semi-gloss surface finish – comparable to Stainless Steel
- Significantly reduced tendency to corrosion by contact with other metals (such as Aluminium and Stainless Steel)
- Improved abrasion resistance due to the ductility / plastic deformability of the coating
- Little to no risk of triggering allergies nickel release is down to only a fraction of the statutory limits relating to objects which come into direct and prolonged contact with the skin (independent results of the reference test method according DIN EN 1811 are available on request)
- Good paint adhesion properties
- Resistance against all commonly used hydraulic media

www.stauff.com

With the STAUFF Digital Platform available at www.stauff.com, commercial customers and users of STAUFF products can not only inform themselves in all detail about the 50000 components typically available from stock, but also directly purchase these online without complex registration.

Main Functionalities of the STAUFF Digital Platform:

Check stock availability and pricing for STAUFF products in real time

Cross references Search by article designations of other manufacturers / suppliers

Live chat Get directly in touch with the STAUFF customer service and sales team

CAD database

Download 3D models and 2D drawings for STAUFF products

General information about the companies of STAUFF Group, latest business and product news as well as complete global contact details also be available.

Advantages as a Registered User of the STAUFF Digital Platform:

Purchase STAUFF products

Taking customer-specific pricing and delivery conditions into account

Ordering w/o searching

Quick ordering by entering article number, quantity and requested delivery date

File upload Direct upload of orders with multiple positions in CSV or Excel file format

Notepad function

Create project lists to save interesting products for later

www.stauff.com/cad

Immediate access to and free download of 3D models and 2D drawings for a growing number of STAUFF products

www.filterinterchange.com

Online database for the quick and easy identification and interchange of almost all common brands and types of replacement filter elements

Additional outside diameters are available upon request. Please contact STAUFF for further information.

Product Features

- Designed for the noise and vibration reducing installation of pipes and tubes
- Suitable for the most common outside diameters from 6 to 42 mm and from 1/4 to 1 1/2 inch respectively · Working principle based on a specially shaped, two-part elastomer insert, which mechanically absorbs vibration in the pipe or tube and as a result reduces noises arising to a minimum
- · Elastomer insert is in particular distinguished by how little of its surface is in contact with the pipe or tube as well as with the clamp body
- Light tension of the elastomer insert in mounted condition provides the necessary clamping force
- Tongue-groove contour of the elastomer insert and the clamp body (which is reversed and thus diverges from standard DIN 3015 clamps with elastomer insert) enables the system to be used for the maximum range of outside diameters per clamp size, which contributes to flexibility, versatility and optimisation of the required installation space

Product Features

- . Design of the inside surface of the clamp body prevents corrugated conduit hoses from sliding
- · Elastomer Insert for the safe and damage-free installation of single cables as an option
- Chamfered edges avoid damaging of the conduit hoses
- · Available for all commonly used nominal sizes
- · Excellent weathering resistance, even under extreme conditions

Recommended Bolt Lengths (Socket Cap Screw IS)

for use without Cover Plate DP, assembly with Weld Plate SP, Hexagon Rail Nut SM and Channel Rail Adaptor CRA.

		25,4	1.00	23,7	.93	325.4- **-* -CC-BK							

Additional outside diameters are available upon request. Please contact STAUFF for further information.

Product Features

- Only one clamp body required for two different hose diameters (compact hose + regular hose)
- Rotate upper clamp half by 180° and use clamp body to fasten compact hoses instead of regular hoses
- Available for three different combinations of outside hose diamaters
- Outer dimensions according to DIN 3015, Part 1
- Effective cost reduction due to lower inventories

Special Materials

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards (such as BS 6853, EN 45545-2, UL 94 and many more).

Ordering Codes

One clamp body is consisting of two clamp halves.

Clamp Body 540-40-PP-VK Rectangular design with a square of 40 mm x 40 mm / 1.57 in x 1.57 in

Clamp Body 540-36-PP-VK Rectangular design with a square of 40 mm x 36 mm / 1.57 in x 1.42 in

Please replace PP by PA to order a clamp body made of Polyamide instead of Polypropylene.

Product Features

- Outer dimensions of clamp body according to Standard Series, STAUFF Group 5
- For proximity switches according to DIN EN 60947-5-2 or similar, rectangular construction, with a square of 40 mm x 40 mm / 1.57 in x 1.57 in or 40 mm x 36 mm / 1.57 in x 1.42 in
- For proximity switches according to DIN EN 60947-5-2 or similar, round construction, please use Standard Series clamp body, STAUFF Group 4, with the diameter required (e.g. 430-PP)
- Use with Hexagon Rail Nut SM and Mounting Rail TS to provide axial and horizontal position adjustment by loosening the bolts

All threaded parts are available with Metric ISO thread or unified coarse (UNC) thread according to dimension table. Alternative materials and surface finishings are available upon request. Contact STAUFF for further information.

Compatibility with Channel Rails

The STAUFF Channel Rail Adaptor, type CRA, is suitable for various channel rails, including the following types:

HALFEN	HILTI	UNISTRUT®	STAUFF (Cushion Clamp Series)
HM 41/41	MQ-21, MQ-41, MQ-52, MQ-72	P1000, P1000T, P1000V, P1000VT, P1001	SCS-048-1-PL, SCS-048-1-GR
HZA 41/22	MQ-21U, MQ-41U, MQ-72U	P2000, P2000T	SCS-120-1-PL, SCS-120-1-GR
HZM 41/41	MQ-21D, MQ-41D, MQ-52-72D	P3003, P3003T, P3300V, P3300VT, P3301	See page 149 for technical information.
HZM 41/22		P4000, P4000T	
HL 41/41, HL 41/B2		P5000, P5000T, P5001, P5500, P5500T, P5501	

To check the compatibility with additional types of channel rail, please compare the dimensions with the following drawing before use.

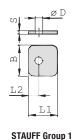

Basic dimensional requirements for channel rails to be used with STAUFF Channel Rail Adaptors, type CRA

Standard Option

A

Please see pages 32 and 33 with detailed order examples for some of the most popular Standard Series clamp assemblies.

3 Clamp Body Design & Material

Please select the design and material of your clamp body and add the corresponding Code to position (3) of the order code for your clamp assembly.

Please check the availability of the selected clamp body design and material according to the matrix table in (2).

Profiled Design

Polypropylene (Colour: Black) Code: **PP-BK**

Code: PA

Aluminium Code: **AL** (for STAUFF Group 1A to 6 only)

Type H (Smooth)

Polypropylene Code: PP-H

Thermoplastic Elastomer (87 Shore-A) Code: **SA-H**

Type RI (with Elastomer Insert)

Polyamide

Code: **PA-R** (for STAUFF Group 4 and 6 only)

See pages 154 / 155 for material properties and technical information.

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards.

(4) Mounting & Fitting Combination

Please select the mounting and fitting combination (e.g. bolts, screws, cover plates etc.) and add the corresponding Code to position ④ of the order code for your clamp assembly.

Installation with Cover Plate and Bolts

Cover Plate DP with Hexagon Head Bolts AS Code: **DP-AS**

Cover Plate DP with Socket Cap Screws IS* Code: DP-IS

Installation with Locking Plate and Bolts

Safety Locking Plate SIG with Stacking Bolts AF Code: **SIG-AF**

Installation with Inserts and Bolts

Inserts EP (Plastic) with Hexagon Head Bolts AS Code: **EP-AS**

Inserts ES (Steel) with Hexagon Head Bolts AS Code: **ES-AS**

Installation with Bolts only

Socket Cap Screws IS (Washers US included) Code: **IS**

Slotted Head Screws LI (Washers US included) Code: LI (for STAUFF Group 1 to 6 only)

* Special lengths of Socket Cap Screws IS required. For exact lenghts, please see details of Hexagon Head Bolt, type AS

(5) Thread Type

Please select the required thread type and add the corresponding Code to position (5) of the order code for your clamp assembly.

Metric ISO thread Code: M

Unified coarse (UNC) thread Code: **U**

All threaded parts are available with Metric ISO thread or unified coarse (UNC) thread according to dimension table.

6 Material & Surface Finishing

Please select the required material & surface finishing of the metal parts and add the corresponding Code to position (o) of the order code for your clamp assembly.

Metal parts made of Carbon Steel, zinc/nickel-plated	W3

Metal parts made of Stainless Steel V2A 1.4301 / 1.4305 (AISI 304 / 303)	W4
Metal parts made of Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti)	W5

Weld Plate made of Carbon Steel, phosphated; Other metal parts made of Carbon Steel. zinc/nickel-plated

Individual combinations of alternative materials and surface finishings are available upon request. Contact STAUFF for further information.

⑦ Assembling & Kitting

If required, please select an additional assembling and kitting option and add the corresponding Code to the last position of the order code for your clamp assembly.

Components supplied separately Code: none (standard option)

Components assembled Code: **A** (special option)

 $\begin{array}{c} \textbf{Components packed in kits} \\ \textbf{Code: } \textbf{K} \text{ (special option)} \end{array}$

SPV-212.7-PP-DP-AS-M-W10

W10 is the standard option for this type of installation.

- 2x Hexagon Head Bolt Surface: W3 Thread: Metric 1x Cover Plate Surface: W3
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface

with tension clearance

2x **Hexagon Rail Nut** Surface: W3 Thread: Metric

Order Code (Mounting Rail TS not included.)

SM-212.7-PP-DP-AS-M-W3

 $\ensuremath{\textbf{W3}}$ is the standard option for this type of installation.

- 2x Socket Cap Screw with Washer Surface: W3 Thread: Metric
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 1x Single Weld Plate Surface: W2 Thread: Metric

Order Code

SP-212.7-PP-IS-M-W10

W10 is the standard option for this type of installation.

- 2x Socket Cap Screw with Washer Surface: W3 Thread: Metric
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 1x Elongated Weld Plate Surface: W2 Thread: Metric

Order Code SPV-212.7-PP-IS-M-W10

W10 is the standard option for this type of installation.

Order Code (Mounting Rail TS not included.)

SM-212.7-PP-IS-M-W3

W3 is the standard option for this type of installation.

1x Single Weld Plate Surface: W2 Thread: Metric

Order Code SP-212.7-PP-LI-M-W10

W10 is the standard option for this type of installation. Available up to STAUFF Group 6 (DIN Group 6) only.

- 2x Slotted Head Screw with Washer Surface: W3 Thread: Metric
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 1x Elongated Weld Plate Surface: W2 Thread: Metric

Order Code

SPV-212.7-PP-LI-M-W10

W10 is the standard option for this type of installation. Available up to STAUFF Group 6 (DIN Group 6) only.

- 2x Slotted Head Screw with Washer Surface: W3 Thread: Metric
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 2x Hexagon Rail Nut Surface: W3 Thread: Metric

Order Code (Mounting Rail TS not included.)

SM-212.7-PP-LI-M-W3

W3 is the standard option for this type of installation. Available up to STAUFF Group 6 (DIN Group 6) only.

Standard Series according to DIN 3015, Part 1

2x Hexagon Head Bolt Surface: W3 Thread: Metric

1x Cover Plate Surface: W3

1x Clamp Body (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance

Order Code

212.7-PP-IS-M-W3

2x Socket Cap Screw with Washer Surface: W3 Thread: Metric

1x Clamp Body (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance

2x Slotted Head Screw with Washer Surface: W3 Thread: Metric

1x Clamp Body (two halves) STAUFF Group 2 (DIN 2) Tube-0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance

Order Code

212.7-PP-DP-AS-M-W3

W3 is the standard option for this type of installation.

2x **Stacking Bolt** Surface: W3 Thread: Metric

1x Safety Locking Plate Surface: W3

1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance

W3 is the standard option for this type of installation.

- 1x Socket Cap Screw with Washer Surface: W3 Thread: Metric 1x Clamp Body (two halves)
- STAUFF Group 1 (DIN 0) O.D. 6 mm / .24 in Material: Polypropylene Profiled inside surface with tension clearance Thread: Metric

1x Single Weld Plate Surface: W2 Thread: Metric

Order Code 212.7-PP-SIG-AF-M-W3

W3 is the standard option for this type of installation.

2x Hexagon Head Bolt Surface: W3 Thread: Metric

2x Insert Material: Plastic

- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 1x Single Weld Plate Surface: W2 Thread: Metric

Order Code SP-212.7-PP-EP-AS-M-W10

 $\boldsymbol{W10}$ is the standard option for this type of installation.

Order Code* SP-106-PP-IS-M-W10

W10 is the standard option for this type of installation.

- 2x Hexagon Head Bolt Surface: W3 Thread: Metric
- 2x Insert Material: Plastic
- 1x **Clamp Body** (two halves) STAUFF Group 2 (DIN 2) 0.D. 12,7 mm / .50 in Material: Polypropylene Profiled inside surface with tension clearance
- 1x Elongated Weld Plate Surface: W2 Thread: Metric

Order Code SPV-212.7-PP-EP-AS-M-W10

W10 is the standard option for this type of installation.

Order Code

212.7-PP-LI-M-W3

W3 is the standard option for this type of installation.

Thread codes

All threaded parts are available with Metric ISO thread or	
unified coarse (UNC) thread according to dimension table.	
Metric ISO thread	М

	IVI
nified coarse (UNC) thread	U

Material codes

Ur

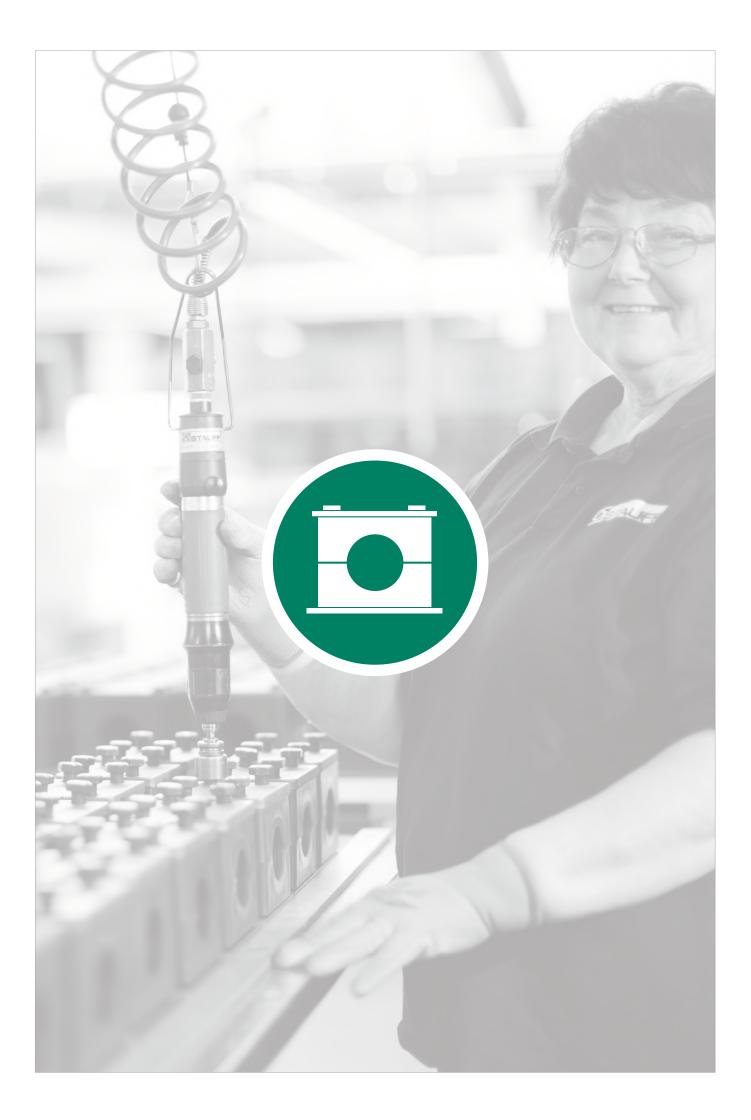

The below listed material codes describe the materials and surface finishings of metal parts that are most relevant for Standard Series clamp assemblies. Individual combinations of alternative materials and surface finishings are available upon request. Contact STAUFF for further information.

Metal parts made of Carbon Steel, zinc/nickel-plated	W3
Metal parts made of Stainless Steel V2A 1.4301 / 1.4305 (AISI 304 / 303)	W4
Metal parts made of Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti)	W5
Wald Distance of Carbon Otaci, absorbated, Other	

Weld Plate made of Carbon Steel, phosphated; Other metal parts made of Carbon Steel, zinc/nickel-plated W10

Technical Notes

* Because of their design, STAUFF Group 1 (DIN Group 0) clamp assemblies only include one single bolt / screw.

• Available for all commonly used pipe and tube outside diameters Additional outside diameters are available upon request. Please contact STAUFF for further information.

Proven, tested and trusted product in various markets

Recommended for the safe installation of rigid pipes and tubes

 Environmental protection due to vibration/noise reducing design - Excellent weathering resistance, even under extreme conditions

Clamp Body	*7*060.3-*PP
One clamp body is consisting of two	clamp halves.
 * 1st part of STAUFF Group * Exact outside diameter Ø D1 (mm * Material code (see below)) 060.3 PP
Standard Materials	

Standard Materials

Colour: Black Material code: PP-BK

Polyamide Colour: Black Material code: PA

Aluminium Colour: Self-Colour Material code: AL

See pages 154 / 155 for material properties and technical information.

Special Materials

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards (such as BS 6853, EN 45545-2, UL 94 and many more).

See pages 156 / 157 for material properties and technical information.

Product Features

- · Proven, tested and trusted product in various markets
- Recommended for the safe installation of rigid pipes and tubes
- Available for all commonly used pipe and tube outside diameters
- Environmental protection due to vibration/noise reducing design
- · Excellent weathering resistance, even under extreme conditions

### **Compatibility with Channel Rails**

The STAUFF Channel Rail Adaptor, type CRA is suitable for various channel rails, including the following types:

HALFEN	HILTI	UNISTRUT®	STAUFF (Cushion Clamp Series)
HM 41/41	MQ-21, MQ-41, MQ-52, MQ-72	P1000, P1000T, P1000V, P1000VT, P1001	SCS-048-1-PL, SCS-048-1-GR
HZA 41/22	MQ-21U, MQ-41U, MQ-72U	P2000, P2000T	SCS-120-1-PL, SCS-120-1-GR
HZM 41/41	MQ-21D, MQ-41D, MQ-52-72D	P3003, P3003T, P3300V, P3300VT, P3301	See page 149 for technical information.
HZM 41/22		P4000, P4000T	
HL 41/41, HL 41/B2		P5000, P5000T, P5001, P5500, P5500T, P5501	

Contact STAUFF to check compatibility with additional types of channel rails.

Basic dimensional requirements for channel rails to be used with STAUFF Channel Rail Adaptors, type CRA

#### Recommended Bolt Lengths when using the Channel Rail Adaptor, Type CRA

Group		Hexagon Head Bolts AS (used with Cove	r Plates DPAL or DPAS)	Socket Cap Screws IS (used without Cover Plates DPAL or DPAS)				
STAUFF	DIN	Metric ISO thread	Unified coarse (UNC) thread	Metric ISO thread	Unified coarse (UNC) thread			
3S	1	M10 x 40	3/8-16 UNC x 1-1/2	M10 x 25	3/8-16 UNC x 1			
4S	2	M10 x 55	3/8-16 UNC x 2-1/4	M10 x 40	3/8-16 UNC x 1-1/2			
5S	3	M10 x 65	3/8–16 UNC x 2-3/4	M10 x 50	3/8–16 UNC x 2			
6S	4	M12 x100	7/16-14 UNC x 3-3/4	M12 x 75	7/16-14 UNC x 3			

Clamp assemblies including Channel Rail Adaptors, type CRA are supplied with the recommended bolt lengths by default. See page 48 for further information on ordering.

Standard Option

Please see pages 50 and 51 with detailed order examples for some of the most popular Heavy Series clamp assemblies.

## (3) Clamp Body Design & Material

Please select the design and material of your clamp body and add the corresponding Code to position (3) of the order code for your clamp assembly.

Please check the availability of the selected clamp body design and material according to the matrix table in (2).

#### **Profiled Design**

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards.

## (4) Mounting & Fitting Combination

Please select the mounting and fitting combination (e.g. bolts, screws, cover plates etc.) and add the corresponding Code to position ④ of the order code for your clamp assembly.

#### Installation with Cover Plate and Bolts

Cover Plate for Single Clamps DPAL with Hexagon Head Bolts AS Code: DPAL-AS

Cover Plate for Double Clamps DPAS with Hexagon Head Bolts AS Code: DPAS-AS

Cover Plate for Single Clamps DPAL with Socket Cap Screws IS* Code: DPAL-IS (for STAUFF Group 3S to 6S only)

#### Installation with Locking Plate and Bolts

Safety Locking Plate SIP with Stacking Bolts AF Code: SIP-AF

#### Installation with Bolts only

Socket Cap Screws IS Code: IS

* Special lengths of Socket Cap Screws IS required. For exact lenghts, please see details of Hexagon Head Bolt, type AS

(for use with Cover Plates DPAL or DPAS) on page 45.

## **(5)** Thread Type

Please select the required thread type and add the corresponding Code to position (5) of the order code for your clamp assembly.

Metric ISO thread Code: M

Unified coarse (UNC) thread Code: U

All threaded parts are available with Metric ISO thread or unified coarse (UNC) thread according to dimension table.

## 6 Material & Surface Finishing

Please select the required material & surface finishing of the metal parts and add the corresponding Code to position (6) of the order code for your clamp assembly.

Metal parts made of Carbon Steel, uncoated	W1
Metal parts made of Carbon Steel, phosphated	W2
Metal parts made of Carbon Steel, zinc/nickel-plated	W3
Metal parts made of Stainless Steel V2A 1.4301 / 1.4305 (AISI 304 / 303)	W4
Metal parts made of Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti)	W5
Weld Plate made of Carbon Steel, phosphated; Other metal parts made of Carbon Steel, zinc/nickel-plated	W10
Weld Plate and Cover Plate made of Carbon Steel, phosphated; Bolts made of Carbon Steel, uncoated	W12
Mounting Rail Nuts made of Carbon Steel, zinc/nickel-plated; Cover Plate made of Carbon Steel, phosphated; Bolts made of Carbon Steel, uncoated	W13
Weld Plate / Cover Plate made of Carbon Steel, phosphated; Bolts made of Carbon Steel, zinc/nickel-plated	W15
Mounting Rail Nuts made of Carbon Steel, zinc/nickel-plated; Cover Plate made of Carbon Steel, phosphated; Bolts made of Carbon Steel, zinc/nickel-plated	W16
Safety Locking Plate made of Carbon Steel, phosphated; Stacking Bolts made of Carbon Steel, zinc/nickel-plated	W17
Safety Locking Plate made of Carbon Steel, uncoated; Stacking Bolts made of Carbon Steel, phosphated	W18
Cover Plate made of Carbon Steel, phosphated; Bolts made of Carbon Steel, uncoated	W19
Individual combinations of alternative materials and s finishings are available upon request. Contact STAUF	

# ⑦ Assembling & Kitting

further information

If required, please select an additional assembling and kitting option and add the corresponding Code to the last position of the order code for your clamp assembly.

Components supplied separately Code: none (standard option)

Components assembled Code: A (special option)

Components packed in kits Code: K (special option)

# Heavy Series according to DIN 3015, Part 2

- 2x Hexagon Head Bolt Surface: W1 Thread: Metric
- 1x Cover Plate for Single Clamps Surface: W2

# **(3) Clamp Body Design & Material**

Please select the design and material of your clamp body and add the corresponding Code to position 3 of the order code for your clamp assembly.

Please check the availability of the selected clamp body design and material according to the matrix table in (2).

#### **Profiled Design**

Polypropylene (Colour: Black) Code: PP-BK

Polyamide Code: PA

#### Type H (Smooth)

Polypropylene (Colour: Black) Code: PP-H-BK

See pages 154 / 155 for material properties and technical information.

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards.

## 4 Mounting & Fitting Combination

Please select the mounting and fitting combination (e.g. Bolts, Cover Plates, etc. ) and add the corresponding Code to position ④ of the order code for your clamp assembly.

#### Installation with Cover Plate and Bolt

Cover Plate GD with **Hexagon Head Bolt AS** Code: GD-AS

Cover Plate GD with Socket Cap Screw IS Code: GD-IS

#### Installation with Locking Plate and Bolt

Safety Locking Plate SI with Stacking Bolt AF Code: SI-AF

Safety Locking Plate SIV with **Stacking Bolt AF** Code: SIV-AF (for STAUFF Group 1D to 3D only)

## (5) Thread Type

Please select the required thread type and add the corresponding Code to position (5) of the order code for your clamp assembly.

Metric ISO thread Code: M

Unified coarse (UNC) thread Code: U

All threaded parts are available with Metric ISO thread or unified coarse (UNC) thread according to dimension table.

# 6 Material & Surface Finishing

Please select the required material & surface finishing of the metal parts and add the corresponding Code to position (6) of the order code for your clamp assembly.

Metal parts made of Carbon Steel, zinc/nickel-plated W3

Metal parts made of Stainless Steel V2A W4 1.4301 / 1.4305 (AISI 304 / 303)

Metal parts made of Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti)

Weld Plate made of Carbon Steel, phosphated; Other W10 metal parts made of Carbon Steel, zinc/nickel-plated

W5

Individual combinations of alternative materials and surface finishings are available upon request. Contact STAUFF for further information

## **7** Assembling & Kitting

If required, please select an additional assembling and kitting option and add the corresponding Code to the last position of the order code for your clamp assembly.

**Components supplied separately** Code: none (standard option)

**Components assembled** Code: A (special option)

Components packed in kits Code: K (special option)

1x Hexagon Head Bolt Surface: W3 Thread: Metric

#### STAUFF ACT Anti-Corrosion Technology

Crevice corrosion formed under a regular plastic clamp

Crevice corrosion formed under a regular plastic clamp

#### **Stainless Steel Pipework**

Stainless steel pipework on oil and gas platform and processing plants (that are located offshore and up to 50 km inland) is used over a wide range of temperature, flow and pressure conditions, e.g. for process instrumentation and sensing, as well as for chemical inhibition, hydraulic or utility lines.

The typical tubing material selected for these particular applications is AISI 316 stainless steel, although in more recent times other tube materials have been utilized to try and counteract the offshore corrosion issue.

In all major offshore oil and gas regions – including the Gulf of Mexico, the North Sea, the Gulf of Guinea and the China Sea – corrosion of AISI 316 stainless steel pipework can be observed, and has been a researched and well documented problem as well as a costly and time consuming issue with regard to maintenance processes for many years.

#### **Pitting Corrosion**

One of the most prevalent forms of localised corrosion is pitting corrosion: Under certain specific conditions – particularly involving chlorides (such as sodium chloride in seawater) and exacerbated by elevated temperatures – small pits can form in a stainless steel surface.

Dependent upon both the environment and the stainless steel itself, these pits may continue to grow and eventually lead to perforation of tubing walls and leaks, while the majority of the surface may still be totally unaffected.

Pitting corrosion is often quite easy to recognise: small individual pits and - in later stages - sometimes deeper and connected pits can be observed by visual inspection with the unaided eye.

#### **Crevice Corrosion**

Another dominant type is crevice corrosion, which is a lot more difficult to observe: It usually tends to occur in shielded areas such as crevices, formed under gaskets, washers, fastener heads, insulating material, surface deposits, disbonded coatings, threads and lap joints.

Pipe clamps made of plastic in particular have also been prone to inducing crevice corrosion in the past, because the plastic deforms around the tubing and creates even tighter crevices.

Crevice corrosion is always initiated by changes in the local chemistry within the shielded area, usually associated with a stagnant solution on the micro-environmental level:

- Trapped seawater becomes stagnant
- Depletion of inhibitor and oxygen
- A shift to acid conditions
- Build-up of aggressive ion species
- (such as sodium chloride in seawater)
- Accelerated corrosion process

Crevice corrosion can have serious and adverse consequences eventually leading to perforation of tubing walls and the escape of highly flammable and hazardous fluids and chemicals.

#### **Material Selection**

Hence, the selection of proper materials and the use of robust design and safe construction practices are mandatory, even if crevices are sometimes difficult or even impossible to avoid in tubing installations when using regular types of tubing supports and clamps.

This is where STAUFF ACT Clamps come into play ...

#### **Corrosion Facts**

Corrosion in general is a naturally occurring phenomenon commonly defined as the deterioration of a substance (usually a metal) or its properties because of a reaction with its environment. Like other natural hazards, corrosion can cause not only expensive but also dangerous damage to almost everything from automobiles, home appliances and drinking water systems to pipelines, bridges and public buildings.

Figures provided by the U.S. National Climatic Data Center underline that major weather related disasters the U.S. incurred total losses of averaging USD 17 billion annually (1980 – 2001). According to U.S. corrosion studies, the estimated direct cost of metallic corrosion in general was USD 276 billion on an annual basis in 1998. This represented 3,1% of the U.S. Gross Domestic Product.

Direct corrosion costs associated with the domestic oil and gas production activities in the U.S. were determined to be about USD 1,4 billion annually, with USD 0,6 billion attributed to surface piping and facility costs, USD 0,5 billion to downhole tubing, and USD 0,3 billion to capital expenditures related to corrosion.

The U.S. refineries represent approximately 23% of the world's petroleum production in 1996 supplying more than 18 million barrels of refined petroleum products per day, with a total corrosion related direct cost of USD 3,7 billion. Maintenance expenses make up USD 1,8 billion of this total, vessel expenses are USD 1,4 billion and fouling costs are approximately USD 0,5 billion annually.

Source of Information: Report No. FHWA-RD-01-156, September 2001 Corrosion Costs and Preventive Strategies in the United States Report by CC Technologies Laboratories, Inc. to Federal Highway Administration Office of Infrastructure Research and Development

#### **Main Features**

Efficient Prevention of Crevice Corrosion under Pipe Clamps on Stainless Steel Pipework Middle- and Long-Term Cost Savings due to Extended Service and Maintenance Intervals

#### **Construction based on STAUFF Clamps**

- Design based on Original STAUFF Clamps according to DIN 3015, Parts 1 and 3 (Standard Series and Twin Series), the tried and tested industry standard for several decades
- Covering the most commonly used metric and imperial pipe diameters from 6 mm to 42 mm (from 1/4 inch to 1 1/2 inch)
- Alternative configurations and pipe diameters on request
- Installation time reduction (compared to alternative designs)

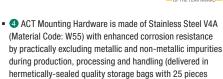

#### Independent Testing and Approval

- Subject to stringent testing at the STAUFF in-house laboratories located in Werdohl (Germany)
- Salt spray tests according to ASTM B117 applied in controlled laboratory environments
- Long-term field tested on a rig in the Dutch sector of the North Sea
- Tests results independently assessed by Centre for Corrosion Technolog at Sheffield Hallam University
- Fully detailed, independent test reports available on request

#### **Innovative Design and Materials**

- Material and design in compliance with section 7.3 (Tubing Installation) of the Norwegian offshore standard Norsok Z-010 (Revision 3, published in October 2000), API RP 552 and NACE SP 0108-2008 (section 13)
- O Clamp body made of flame-retardant PP-V0 plastic material; tested and V0 classified according to UL 94
- Integrated ACE anti-corrosion elastomer strips avoid the accumulation of seawater between clamp body and pipe
- Orainage channels aid the dispersal of seawater (self-draining)

Technology protected

by utility model patent

Corrosion Innovation

 High UV stability of the clamp body material; resistant against seawater, rain and oil

each to avoid contamination during transport)

- Suitable for continuous exposure to temperatures from -25 °C to +80 °C (from -13 °F to +176 °F)
- To be used in sub-sea and top-side environments; alleviating the requirement for two different products

Salt-spray testing of ACT Mounting Hardware (above of the picture) compared to contaminated hardware made of Stainless Steel V4A (below of the picture)

#### Design

STAUFF ACT Clamps are an innovatively designed solution for the installation of instrumentation pipework where anti-corrosion properties are of paramount importance (e.g. in the fields of offshore oil and gas exploration and processing).

The design – based on the tried and tested STAUFF Clamps according to DIN 3015 – offers installation time reduction and long term cost savings due to extended service intervals.

The STAUFF ACT clamp body design is available for the Standard Series (DIN 3015, Part 1) and the Twin Series (DIN 3015, Part 3) to cover the most commonly used metric and imperial pipe diameters from 6 mm to 42 mm (1/4 inch to 1 1/2 inch).

#### Development

Throughout their development, STAUFF ACT Clamps have been subject to stringent testing at the STAUFF in-house laboratories located in Werdohl, Germany.

In order to ensure credibility of the product, the development process has also involved independent testing.

#### Sheffield Hallam University

To achieve this, the services of the Centre for Corrosion Technology at Sheffield Hallam University's Materials and Engineering Research Institute have been utilized, applying advanced techniques with equipment such as high resolution surface metrology and form measurement systems. In a controlled laboratory environment, continous hot salt spray tests according to ASTM B117 have been applied for periods of 2000 hours to various clamp configurations holding AISI 316 stainless steel tubing.

In addition to that, independent field test samples – located on an oil rig in the Dutch sector of the North Sea – have also been assessed at the Sheffield Hallam University facilities.

Both independent tests have recorded positive results in favour of the anti-corrosion attributes of the STAUFF ACT Clamp. Fully detailed test reports are available upon request.

#### Conformity

Using flame-retardant PP-V0 plastic material for the clamp body and ACE anti-corrosion elastomer material for the rubber strips, STAUFF ACT Clamps have been constructed in compliance with section 7.3 (Tubing Installation) of the Norwegian offshore standard Norsok Z-010 (Revision 3, published in October 2000). They also comply with Norsok I-001 (Revision 4, published in January 2010), API RP 552 and NACE SP 0108-2008 (section 13).

#### **The Norsok Organisation**

Norsok is a Norwegian industry initiative to add value, reduce cost and lead time and remove unnecessary activities in offshore field developments and operations.

The Norsok standards are developed by the Norwegian petroleum industry and are jointly issued by the Norwegian Oil Industry Association (OLF) and the Federation of Norwegian Engineering Industries (TBL). They are administered by the Norwegian Technology Standards Institution (NTS).

The purpose of the Norsok industry standards is to replace the individual oil company specifications for use in existing and future petroleum industry developments, subject to the individual company's review and application.

#### **ACT Mounting Hardware** Installation on Single Weld Plates

#### Required components (for use with single weld plate):

- 2 ACT Hexagon Head Bolts AS...W55
- 1 ACT Cover Plate DP W55
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 ACT Single Weld Plate SP...W55

Before welding, always make sure that the designated position of the ACT Weld Plate is suitable for the expected loads.

#### Material Code W55

#### **ACT Mounting Hardware** Material Properties and Handling Instructions

ACT Mounting Hardware is made of Stainless Steel V4A (Material Code: W55) with enhanced corrosion resistance by practically excluding metallic and non-metallic impurities during production, processing and handling.

ACT Mounting Hardware is always delivered in hermetically-sealed quality storage bags with 25 pieces each to avoid contamination during transport.

Always make sure that ACT Mounting Hardware is stored separately from carbon steel and any other metals, and that appropriate tools are used to assemble the clamps. Details: www.stauff.com/act/assembly

ACT Hammerhead Bolts are suitable for field trays and cable ladders with diagonal, lengthwise and/or crosswise slots and perforations that meet the following requirements:

- Dimension A: Equal to the bolt center spacing of the clamp assembly
   Dimension B: 6,2 mm ... 7,0 mm / .24 in ... .28 in (Min ... Max)
- In case of doubt, please do not hesitate to contact STAUFF prior to field application.

## STAUFF ACT Clamps: Anti-Corrosion Technology

#### Multi-Level Installation (with Weld Plate)

Required components (for each level) for a maximum of two levels in total:

2 Stacking Bolt AF...W55

1 Safety Locking Plate SIG...ACT-W55

1 ACT Clamp Body (2 Clamp Halves)

The upper layer has to be secured by a cover plate and hexagon head bolts. The lower level has to be mounted to a weld plate.

SP-110a-ACT-DP-AS-M-W55

#### Installation on Weld Plate

#### Required components:

- 2 Hexagon Head Bolts AS...W55
- 1 Cover Plate DP...W55
- 1 ACT Clamp Body (2 Clamp Halves) 1 Single Weld Plate SP...W55

Before welding, always make sure that the designated position of the weld plate is suitable for the expected loads.

#### **Order Code**

#### 110a-ACT-SIG-AF-M-W55

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

CRA-110a-ACT-DP-AS-M-W55

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

#### Installation with Channel Rail Adaptors

Required components:

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

- 2 Hexagon Head Bolts AS...W55
- 1 Cover Plate DP...W55
- 1 Clamp Body (2 Clamp Halves) 2 Channel Rail Adaptors CRA...W55
- 2 Ghannei Han Auaptors GhA....W55

Suitable for various brands and types of channel rails (including Halfen, Hilti, Unistrut® etc.).

#### Installation in Field Trays / Cable Ladders

Required components:

2 Self-Locking Nuts MUS-HKS ... W55 1 Cover Plate DP ... W55

- 1 Clamp Body (2 Clamp Halves)
- 2 Hammerhead Bolts HKS ... W55

Suitable for commonly used field trays and cable ladders with diagonal, lengthwise and/or crosswise slots and perforations.

## STAUFF ACT Clamps: Anti-Corrosion Technology

#### Multi-Level Installation (with Weld Plate)

Required components (for each level) for a maximum of two levels in total:

1 Stacking Bolt AF...W55

- 1 Safety Locking Plate SIG...W55
- 1 ACT Clamp Body (2 Clamp Halves)

The upper layer has to be secured by a cover plate and hexagon head bolts. The lower level has to be mounted to a weld plate.

#### **Order Code**

#### 110/10-ACT-SIV-ACT-AF-M-W55

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

**Order Code** 

#### Installation with Channel Rail Adaptors

Required components:

1 Hexagon Head Bolt AS...W55

Installation on Weld Plate

1 Hexagon Head Bolt AS...W55 1 Cover Plate GD...W55

1 Single Weld Plate SP...W55

1 ACT Clamp Body (2 Clamp Halves)

Before welding, always make sure that

is suitable for the expected loads.

the designated position of the weld plate

Required components:

- 1 Cover Plate GD...W55
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 Channel Rail Adaptor CRA...W55

Suitable for various brands and types of channel rails (including Halfen, Hilti, Unistrut® etc.).

#### Installation in Field Trays / Cable Ladders

Required components:

- 1 Self-Locking Nut MUS-HKS ... W55
- 1 Cover Plate GD ... W55
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 Hammerhead Bolt HKS ... W55

Suitable for commonly used field trays and cable ladders with diagonal, lengthwise and/or crosswise slots and perforations.

#### **Order Code**

#### CRA-110/10-ACT-GD-AS-M-W55

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

#### **Multi-Level Installation** in Field Trays / Cable Ladders

Required components (for a maximum of two levels in total):

- 1 Self-Locking Nut MUS-HKS ... W55
- 1 Cover Plate GD ... W55
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 Stacking Bolt AF-HKSK...W55
- 1 Safety Locking Plate SIV...ACT
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 Hammerhead Bolt HKSK ... W55

Suitable for commonly used field trays and cable ladders with diagonal, lengthwise and/or crosswise slots and perforations.

#### **Order Codes**

Upper Level: HKSK-212.7/12.7-ACT-GD-MUS-M-W55 Lower Level: 212.7/12.7-ACT-SIV-ACT-AF-HKSK-M-W55

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

**Order Code** 

#### **Multi-Level Installation** in Field Trays / Cable Ladders

Required components (for a maximum of two levels in total):

1 Self-Locking Nut MUS-HKS ... W55

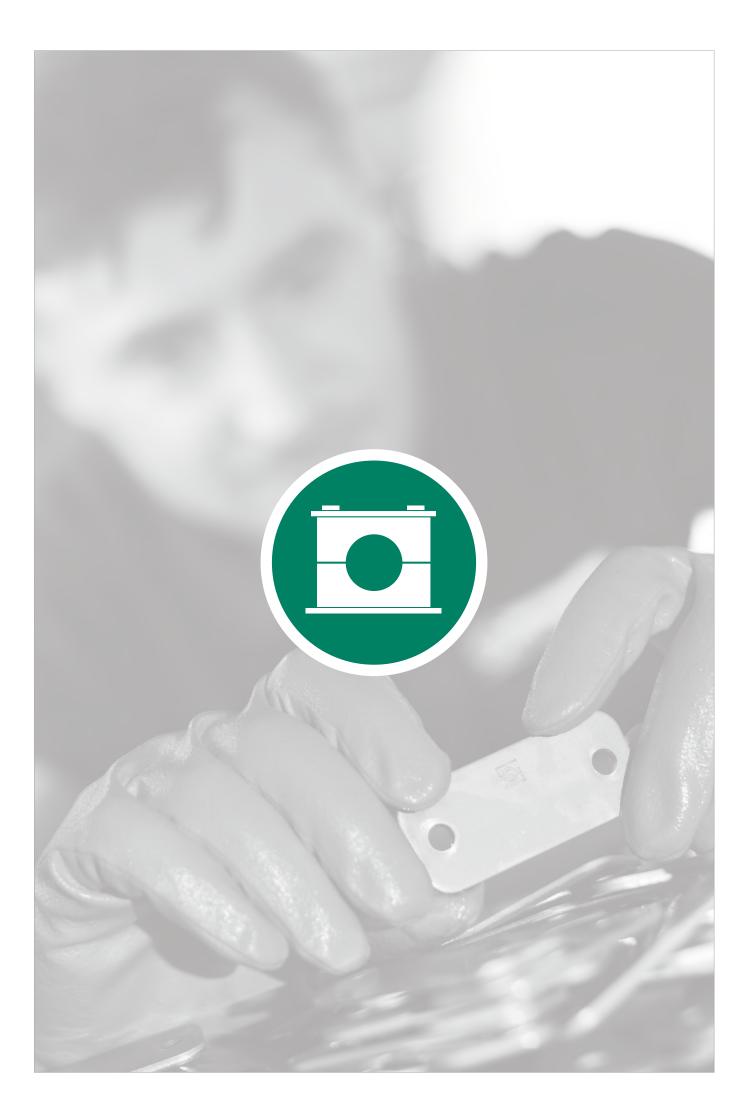

- 1 Cover Plate GD ... W55 1 ACT Clamp Body (2 Clamp Halves)
- 1 Safety Locking Plate SIV-ACT
- 1 ACT Clamp Body (2 Clamp Halves)
- 1 Hammerhead Bolt HKSV ... W55

Suitable for commonly used field trays and cable ladders with diagonal, lengthwise and/or crosswise slots and perforations.

#### **Order Codes**

#### Upper Level: HKSV-212.7/12.7-ACT-GD-MUS-M-W55 Lower Level: 212.7/12.7-ACT-SIV-ACT

W55 is the recommended option for metal hardware to be used with STAUFF ACT Clamps.

#### **STAUFF SWG Stud Welding System**

In many areas, stud welding is considered to be the most economic fastening method for components and is sometimes even the only technically feasible solution. Because the stud is joined with the substructure over the entire surface of the stud, a high strength of the ioint can be achieved.

STAUFF is now using this proven principle for the installation of pipe, tube, hose and cable clamps in the Standard Series (according to DIN 3015, part 1) as well as in the Twin Series (according to DIN 3015, part 3) with M6 mounting thread, where female threaded weld studs replace the regular weld plates; distance plates made from plastic provide the necessary spacing between the clamp bodies and the substructure.

If required, the system can also be adopted for alternative fastening methods, e.g. for clamping belts, cable ties or conduit hoses.

In addition to the individual components - weld studs, distance plates, clamp bodies and metal hardware required - STAUFF also provides the correspondingly designed assembly tools such as the weld inverter and the weld gun with distance tube, stud retainer and distance adaptor for DIN 3015 clamps. The lightweight and compact weld inverter works without high-voltage current.

Thanks to increased productivity and flexibility for the installation of clamps, the system offers considerable savings potentials for users with significant processing volumes, especially when working in horizontal or overhead position. The amount of rework on welding locations can be significantly decreased, and material distortion is reduced to a minimum through low thermal stress

The joint of the weld stud with the substructure impresses in particular with a high degree of strength and safety, which is at least at the same level as for regular weld plates.

- Developed and optimised to the functions of original STAUFF Clamps in the Standard Series (DIN 3015, Part 1)
- Versatile combination and adaptation options available (e.g. fastening elements for conduit hoses, clamping belts and cable ties)
- All installation options are fully covered by only one weld stud
- Significant time and cost savings by a quicker welding process and reduced rework on welding locations
- Material distortion reduced to a minimum through low thermal stress (particularly significant when handling thin metal sheets)
- High degree of safety and protection against corrosion due to a welded joint over the whole surface
- Lightweight and compact designed welding inverter
- By default no shielding gas or ceramic ferrule required
- Works without high-voltage current

R

STALIFI

- Weld Stud SWG-SF
- Distance Tube DIT-SR6-SWG-WG25
- (for STAUFF Group 1A, if required)

F

Weld Inverter Type SWG-WI06

#### **Characteristics**

- Works without high-voltage current
- No heavy extension cords required
- Extremely powerful and robust
- Compact in design
- Lightweight with only 18 kg / 40 lbs
- Welding current: 100 ... 650 A (stepless control)
- Welding time: 5 ... 200 ms (stepless control)
- Connection Cable: 3 m / 9.84 ft

#### **Required Accessories**

Weld Gun SWG-WG and Accessories
 Ground Cable SWG-GC

#### **Technical Data**

#### Primary Power

- 100 V to 240 V, 1 phase, 50/60 Hz, 16 AT
- Primary Plug
- 16 A 2-pin grounded safety plug (plug type F CEE 7/4)

#### IP Code

- IP 44 (also permits operation outdoors)
- **Ambient Temperature Limits** ■ ±0 °C ... +40 °C / +32 °F ... +104 °F
- **Dimensions** (L x W x H)
- 474 x 337 x 351 mm / 18.66 x 13.27 x 13.82 in

#### Weld Gun - Arc Ignition Type SWG-WG

#### **Characteristics**

- Compact in design
- Lightweight with only 0,8 kg / 1.8 lbs (without cable)
- Ergonomic handle
- Comfortable setup
  Connection Cable: 5 m / 16.40 ft
- **Required Accessories**
- Distance Adaptor SWG-AGS-... for DIN 3015 Clamps
- Distance Tube DIT-SR6-SWG-WG30 (for STAUFF Groups 2 to 8)
- Distance Tube DIT-SR6-SWG-WG25 (for STAUFF Group 1A)
- Stud Retainer SWG-SR6

#### **Technical Data**

#### Lift

- Adjustment range 3 mm / .11 in, lockable
- Workplace noise level • Up to 90 dB (A) may occur during welding
- Dimensions (L x W x H)
- 200 x 65 x 140 mm / 7.87 x 2.56 x 5.51 in (without cable, without distance tube)

Clamp assembly consisting of:

- I Hexagon Head Bolt AS
- 1 Cover Plate LBBU-DP I Sleeve LBBU-HUE
- I Clamp Body LBBU
- I Weld Plate LBBU-SP

# (with Hexagon Rail Nut SM-2-5D)

Clamp assembly consisting of:

- I Hexagon Head Bolt AS

I Hexagon Rail Nut SM-2-5D

### Order Code (Mounting Rail TS not included.) LBBU-SM-322-SA-DP-AS-M8-W3

W3 (Metal parts made of Carbon Steel, zinc/nickel-plated) is the standard option for this type of installation. For UNC threads / bolts, please replace M8 by U5/16.

Clamp assembly consisting of: I Hexagon Head Bolt AS

Type of Mounting PM

(for panel mounting without Weld Plate or Hexagon Rail Nut)

- I Cover Plate LBBU-DP 1 Sleeve LBBU-HUE
- I Clamp Body LBBU

### Order Code LBBU-PM-322-SA-DP-AS-M8-W3

W3 (Metal parts made of Carbon Steel, zinc/nickel-plated) is the standard option for this type of installation. For UNC threads / bolts, please replace M8 by U5/16.

Alternative sizes (e.g. for bolts M6 and 1/4–20 UNC), materials and surface finishings are available upon request.

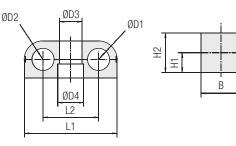

Type of Mounting SM

- 1 Cover Plate LBBU-DP
- I Sleeve LBBU-HUE
- I Clamp Body LBBU

(for use with Mounting Rail TS, see page 24 for details)

# **Standard Materials**

**Ordering Codes** 

Thermoplastic Elastomer (87 Shore-A) Colour: Black Material code: SA

See pages 154 / 155 for material properties and technical nformation.

Alternative materials are available upon request. Please contact STAUFF for further information.

# **Product Features**

- Compact and light-weight design for applications in which space is limited
- Available in 3 different sizes and covering all standard metric and imperial diameters between 4 mm and 32 mm
- Vibration-damping and noise-reducing clamp body material with UV, ozone and weathering-resistant characteristics
- · Embedded metal sleeve to ensure stability of the clamp assembly

Additional outside diameters and combinations of different outside diameters are available upon request. Please contact STAUFF for further information.

# Saddle / Piggyback Clamps

Type ZR saddle clamps from STAUFF allow direct fixing and safe guiding of pipes, tubes and hoses on hydraulic cylinders and other round or oval structures, without causing damage to their strength or integrity as with screw-fixing or welding and without preparation or reworking of the surface coating. The simple system also allows a pipe, tube or hose with a small outer diameter to be installed on top of a significantly larger one.

The position can be adjusted at any time thanks to free axial and radial positioning of the clamps on the structure. This also makes the system suitable for retrofitting.

The standard version ZR-518 made of thermoplastic elastomer material covers diameters in a range from 50 to 200 mm / 1.96 to 7.87 in for the cylinder and from 10 to 22 mm / .39 to .87 inch for the attached tube or hose. The diameters to be covered are used to calculate the overall length of the required tightening straps or the dimensions of the steel strap or worm drive hose clamp, e.g. according to DIN 3017.

STAUFF meets deviating requirements with numerous other variants which were implemented in the past and can be manufactured again at any time.

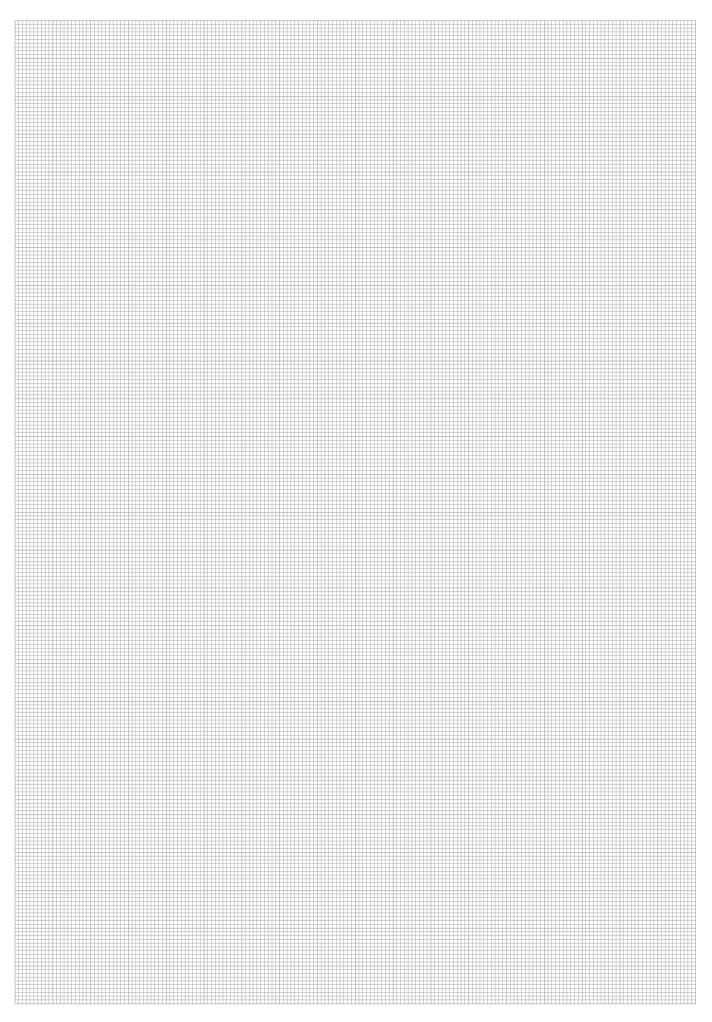

If required, customised clamps can be developed for specific requirements or manufactured based on drawings and models provided.

Please contact STAUFF for further information.

# Flat Steel U-Bolt with Plastic Pipe Saddle (Short) and U-Profile

*FB+RUK-*48.3-*PP-*W

Type FB+RUK (To be used as Fixed Point Clamps only)

One clamp assembly is consisting of one Flat Steel U-Bolt (type FB), one Plastic Pipe Saddle (type RUK), one U-Profile (to DIN 1026) with two Nuts (to DIN EN ISO 4032) and two Hexagon Head Bolts (to DIN EN ISO 4014 / 4017).

Carbon Steel, zinc-plated,

Carbon Steel, uncoated.

1.4401 / 1.4571 (AISI 316 / 316 Ti) The U-Profile (to DIN 1026) is made of

All items are supplied assembled.

Alternative materials are available upon request. Please contact STAUFF for further information.

# **Applications**

- Standing or hanging installation of pipes and tubes on beams, profiles and consoles
- Design with two threaded ends allows for ideal adaptation to suit the exact outer diameter of the pipe or tube

# **Ordering Codes**

Flat Steel U-B	olt *FB-*A-48.3	8-*W1
* Flat Steel U-Bol	t	FB
* Exact outside di	ameter Ø D1 (mm)	A-48.3
* Material code	Carbon Steel, uncoated Carbon Steel, zinc-plated, blue-chromated	W1 W32
	Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 )	<b>W5</b> Гі)
only Plastic Pi	pe Saddle *RUK-*48.	3-*PP
* Plastic Pipe Sac	ldle (Short)	RUK
* Exact outside di	ameter Ø D1 (mm)	48.3
* Material of Pipe	Saddle (see below)	PP
Please note:	All items are supplied assembled	

# **Standard Materials for Plastic Pipe Saddles**

Colour: Black Material code: PA

See pages 154 / 155 for material properties and technical information.

Alternative materials are available upon request. Please contact STAUFF for further information.

# **Applications**

- Standing or hanging installation of pipes and tubes on beams, profiles and consoles
- Design with two threaded ends allows for ideal adaptation to suit the exact outer diameter of the pipe or tube

# Round Steel U-Bolt with Plastic Pipe Saddle (Short) Type RB+RUK

### **Ordering Codes** *RB+RUK-*48.3-*PP-*W1 **Clamp Assembly** One clamp assembly is consisting of one Round Steel U-Bolt (type RB), one Plastic Pipe Saddle (type RUK) and four Nuts (to DIN EN ISO 4032). * Clamp Assembly (as listed above) RB+RUK * Exact outside diameter Ø D1 (mm) 48.3 * Material of Pipe Saddle (see below) PP * Material code Carbon Steel, uncoated W1 Carbon Steel, zinc-plated, W32 blue-chromated Stainless Steel V4A W5 1.4401 / 1.4571 (AISI 316 / 316 Ti) Please note: All items are supplied non-assembled.

# **Standard Materials for Plastic Pipe Saddles**

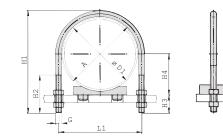

Polypropylene Colour: Green Material code: PP Polyamide Colour: Black Material code: PA

See pages 154 / 155 for material properties and technical information.

Alternative materials are available upon request. Please contact STAUFF for further information.

# Applications

- Standing or hanging installation of pipes and tubes on beams, profiles and consoles
- Design with two threaded ends allows for ideal adaptation to suit the exact outer diameter of the pipe or tube

Round Steel U-Bolt (type RB) with Plastic Pipe Saddle (type RUK)

# Metal Pipe Clamp with Tension Clearance (DIN 3567-A) Two-Bolt Design

Ordering Codes									
Metal Pipe Clamp *DIN3567-A*-20*W1									
	One metal pipe clamp is consisting of two clamp halves. Hexagon head bolts and nuts are not included.								
* Metal Pipe Clarr	np to DIN 3567, type A DIN3567-A								
* STAUFF Group (	Ø D1) -20								
* Material code	Carbon Steel, uncoated W1								
	Carbon Steel, hot-dip galvanised W40								
	Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti) <b>W5</b>								
Clamp Assem	bly *DIN3567-A*-20*W1*COMPL								
•	bly is consisting of two clamp halves, I bolts and two hexagon head nuts.								
* Metal Pipe Clam	np to DIN 3567, type A DIN3567-A								
* STAUFF Group (	Ø D1) -20								
* Material code	Carbon Steel, uncoated W1								
	Carbon Steel, hot-dip galvanised W40								
	Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 / 316 Ti) <b>W5</b>								
* Clamp assembly	with bolts and nuts COMPL								
Please note: All ite	ms are supplied non-assembled.

Metal Pipe Clamp

*DIN3567-B*-20*W1

One metal pipe clamp is consisting of two clamp halves. Hexagon head bolts and nuts are not included.

* Metal Pipe Clamp to DIN 3567, type B DIN35						
* STAUFF Group (	-20					
* Material code	Carbon Steel, uncoated	W1				
	Carbon Steel, hot-dip galvar	nised W40				
	Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 /	316 Ti) <b>W5</b>				
Clamp Assem	bly *DIN3567-B*-20*W	1*COMPL				

One clamp assembly is consisting of two clamp halves, three hexagon head bolts and three hexagon head nuts.

* Metal Pipe Clam	DIN3567-B	
* STAUFF Group (	-20	
* Material code	Carbon Steel, uncoated	W1
	Carbon Steel, hot-dip galvar	ised W40
	Stainless Steel V4A 1.4401 / 1.4571 (AISI 316 /	316 Ti) <b>W5</b>
* Clamp assembly	with bolts and nuts	COMPL
Please note: All ite	ms are supplied non-assembl	ed

# Applications

 Installation of pipes, tubes and other construction elements on beams, profiles and consoles

Alternative materials and surface finishings are available upon request. Contact STAUFF for further information.

* Minimum required for installation.

One clamp assembly is consisting of two carbon steel clamp halves (one with threaded stud), one thermoplastic cushion insert and one lock nut with Nylon insert. Channel rail not included. All threaded parts are only available with unified coarse (UNC) thread. Alternative materials and surface finishings are available upon request. Contact STAUFF for further information.

### Clamp Assembly = Types STC / SPC

(for Use with Channel Rail SCS)

### **Standard Materials**

Cushion Insert Thermoplastic Elastomer (80 Shore-A) Colour: Black

The cushion material is compatible with most oils, chemicals and cleaning solvents and suitable for applications within a temperature range of -50 °C ... +125 °C (-58 °F ... +257 °F).

Alternative materials are available upon request. Please contact STAUFF for further information.

#### **Product Features**

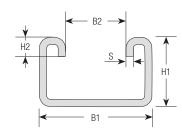

- Clamp assemblies designed to mount directly to 41,3 mm / 1-5/8 in wide strut channels, such as the STAUFF Channel Rail, type SCS
- Suitable for most Fluid Power applications ranging from mobile equipment to industrial machinery
- Reduced horizontal mounting space
- Easy installation and retro fit capabilityReduces shock and vibration while preventing
- galvanic corrosion

### **Special Clamp Body Materials**

Please contact STAUFF for further details on fire-proof clamp body materials, tested and approved according to several international fire-protection standards (such as BS 6853, EN 45545-2, UL 94 and many more).

See pages 156 / 157 for material properties and technical information.

The information for the Polyamide material PA have been determined in a conditioned state according to ISO 1110. For Aluminium, the tensile strength (under reversed bending stress) and impact bending strength both rise constantly at decreasing temperatures whilst the value for breaking elongation decreases.

STAUFF preserves the right to supply products made from alternative, but comparable materials with matching technical characteristics.

0

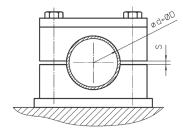

### **Standard Clamp Body Designs**

### **Profiled Design**

### **Profiled Inside Surface with Tension Clearance**

- Available in the Standard, Heavy, Twin and Heavy Twin Series
- · Recommended for the safe installation of rigid pipes or tubes
- · Available for all commonly used outside diameters and nominal sizes
- Vibration/noise reducing and impact absorbing effect towards the direction of the line provided by the grooves on the inside of the clamp bodies
- · Clearance S between the clamp halves provides tension of the tube or pipe
- To be used as fixed point clamp preventing the line from sliding (see page 161 for Maximum Loads in Pipe Direction)

R

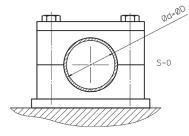

STALI

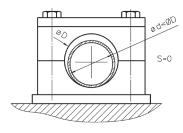

### Type H (Smooth)

### Smooth Inside Surface w/o Tension Clearance

- · Available in the Standard, Heavy and Twin Series
- Recommended for the safe installation of hoses or cables
- · Available for all commonly used outside diameters and nominal sizes
- Smooth inside surface and chamfered edges avoid damaging of the hose or cable
- Choose the diameter ØD of the clamp body slightly larger (in accordance to your specific requirements) than the outside diameter  $\operatorname{\texttt{Ød}}$  of the pipe, tube, hose or cable in order to use it as a longitudinal guide allowing the line to slide

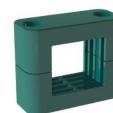

### Type RI (with Elastomer Insert)

- Available in the Standard, Heavy and Heavy Twin Series
- · Recommended for the extra-gentle installation of pipes, tubes hoses or cables
- · Available for all commonly used outside diameters and nominal sizes
- · Elastomer insert made of Thermoplastic Elastomer with a hardness of 73 Shore-A provides most effective reduction of vibration and noise caused by vibration

### **Rectangular Design = Type VK**

- Available in the Standard Series (STAUFF Group 5)
- · Recommended for the safe installation of proximity switches according to DIN EN 60947-5-2 or similar, rectangular construction, with a square of 40 mm x 40 mm (1.57 in x 1.57 in) or 40 mm x 36 mm (1.57 in x 1.42 in)

Catalogue 1 - Edition 08/2022

### **Materials and Surface Finishings of Metal Parts**

### **Materials**

Unless otherwise stated, all metal parts (e.g. weld plates, cover plates, bolts, rail nuts etc.) are made of **Carbon Steel** (surface finishing according to material code).

Besides that, all metal parts are also available **ex stock** in two different stainless steel qualities:

#### Stainless Steel V2A

Stainless Steel V4A

- 1.4301 / 1.4305 (AISI 304 / 303)
- Material code: W4

# 

Rost

- 1.4401 / 1.4571 (AISI 316 / 316 Ti)
- Material code: W5

#### Aluminium

- Aluminium EN AW-6060
- Material code: W85

Alternative materials (e.g. Aluminium) are available upon request. Contact STAUFF for further information.

### **Surface Finishings**

Unless otherwise stated, all metal parts made of Carbon Steel are available with the following standard surface finishings:

#### Carbon Steel, uncoated

Material code: W1

#### Carbon Steel, phosphated

- Fe/Znph r 10 according to DIN EN 12476
  Material code: W2

### Carbon Steel, zinc/nickel-plated

- More than 1200 hours resistance against red rust / base metal corrosion in the salt spray test to DIN EN ISO 9227
- Free of hexavalent chromium Cr(VI)
  RoHS compliant according to 2002/95/EC
- (Restrictions of the Use of Hazardous Substances) ELV compliant according to 2000/53/EC
- (End of Life Vehicles Directive) Material code: W3
- Material code: W3

Alternative surface finishings are available upon request. Contact STAUFF for further information.

Original STAUFF Cover Plate with Zinc/Nickel-Coating: No signs of corrosion after <u>1200 hours</u> in the salt spray chamber!

Original STAUFF Cover Plates with alternative surface finishings widely-used by competitors in the market (from left to right):

- Galvanisation and blue-chromating after 96 hours
- Galvanisation and yellow-chromating after <u>192 hours</u>
- Zinc-coating, thick-film passivation and sealing after <u>192 hours</u>

In all three cases, signs of white and red rust / base metal corrosion are quite clearly visible! Please do not hesitate to contact STAUFF and ask for a detailed report.

**Property Classes / Grades of Bolts and Screws** 

### **Thread Conversion Chart**

### Metric ISO vs. Unified Coarse (UNC) Thread

Unless otherwise stated, all threaded parts available with Metric ISO thread or unified coarse (UNC) thread.

#### Standard Series (DIN 3015, Part 1)

Group		Thread		Bolt
STAUFF	DIN	Metric ISO	Unified Coarse	
1 to 8	0 to 8	M6	1/4-20 UNC	

### Heavy Series (DIN 3015, Part 2)

	W5	A4-70 (according to DIN EN ISO 3506)	AISI 316 / B8M (according to ASTM A193)

Unless otherwise stated, the above mentioned property classes / grades apply as standards for bolts and screws supplied by STAUFF. The information indicate the minimum requirements; higher property classes are available upon request. Contact STAUFF for details.

# STAUFF

### **Basic Installation Instructions**

### **Installation on Weld Plate**

Different types of weld plates are available for all STAUFF Clamps according to DIN 3015 as well as for most of the other series and many custom-designed special clamps.

- Place weld plates in their designated positions. Please make sure these positions are suitable for the expected loads.
- Mark the positions of the weld plates to ensure best alignment.
- Weld the weld plates into position. Elongated weld plates can also be mounted to their positions by using screws or bolts.
- Push bottom clamp half onto weld plate.
- Insert pipe, tube, hose, cable or any other type of line.
- Place second clamp half and cover plate (optional) on top and mount clamp assembly by using screws or bolts.

Unless otherwise stated, the bolt lengths indicated for clamps according to DIN 3015 refer to the installation on weld plages and mouting rails as well as multi-level (stacking) installation. For direct installation, different lengths may be required.

### Installation on Mounting Rail

STAUFF Mounting Rails are available in different heights. STAUFF Rail Nuts are available for all STAUFF Clamps according to DIN 3015 (Heavy Series up to STAUFF Group 6S only) as well as for many custom-designed special clamps.

- Place mounting rails in their designated positions. Please make sure these bases are suitable for the expected loads.
- Mark the positions of the mounting rails to ensure best alignment.
- Weld the mounting rails into position. Mounting rails can also be mounted to their positions by using side-mounting brackets with screws or bolts.
- Insert rail nuts into mounting rail and turn until stop to lock (Standard and Twin Series) or slide in rail nut (Heavy Series).
   Push bottom clamp half onto rail nuts.
- Insert pipe, tube, hose, cable or any other type of line.
- Place second clamp half and cover plate (optional) on top and mount clamp assembly by using screws or bolts.

The exact positions of the clamp assemblies can still be adjusted before being firmly bolted.

### **Multi-Level (Stacking) Installation**

Stacking bolts permit the multi-level assembly of clamps of identical group sizes. Safety locking plates inserted between the levels prevent the stacking bolts from turning. The Twin Series also allows stacking of different group sizes (STAUFF Groups 2D to 5D).

- Push bottom clamp half onto weld plate or rail nuts.
- Insert pipe, tube, hose, cable or any other type of line.
- Place second clamp half.
- Insert stacking bolts into the clamp assembly and tighten using the following tightening torques (or in a way that the clamp halves are in contact with the line over the entire internal contact surface):
- Standard Series
   1 ... 2 N·m / .75 ... 1.5 ft-lb (hand-tightened)

   Heavy Series
   5 N·m / 3.75 ft-lb
- Twin Series
   1 ... 2 N·m / .75 ... 1.5 ft·lb (hand-tightened)

   Place safety locking plate on top of clamp assembly.
- Proceed with next levels. Top level to be assembled with cover plate and hexagon head bolts using the tightening torques as indivated on page 161.

STAUFF multi-level clamp assemblies can be mounted both to weld plates or to mounting rails (with rail nuts).

### **Recommended Distance between Clamps**

Please note: The recommended distances between clamps stated below are standard values and valid for static loads only.

<b>Outside Diameter</b>	side Diameter Distance A			<b>Outside Diameter</b>	Distance A		
(mm)	(in)	(m)	(ft)	(mm)	(in)	(m)	(ft)
6,0 12,7	.2350	1,00	3,28	114,0 168,0	4.50 6.60	5,00	16,40
12,7 22,0	.5086	1,20	3,94	168,0 219,0	6.60 8.60	6,00	19,68

### Installation next to Pipe Bends, Connectors / Couplings and Valves

Please note the following information on the installation of STAUFF Clamps next to pipe bends, connectors / couplings and valves:

#### Pipe Bends

Pipe bends should be supported by STAUFF Clamps as close to the bends as possible. Furthermore, it is recommended to design these clamps as fixed point clamps.

#### **Connections / Couplings**

The first clamp should be placed directly next to the connector / coupling. This protects the connector / coupling from vibrations.

#### Valves

If valves are incorporated in the pipelines, it is recommended that support is provided in front of and behind these valves.

Contact STAUFF for further information.

### **Tightening Torques and Maximum Loads In Pipe Direction**

### Standard Series (DIN 3015-1:1999)

All tightening torques and maximum loads in pipe direction refer to STAUFF Clamp Bodies (profiled inside surface with tension clearance) with Cover Plates, Weld Plates and Hexagon Head Bolts according to DIN EN ISO 4014/4017 (DIN 931/933).

The max. load in pipe direction (according to DIN 3015-10:1999) is an average value, determined by three tests at +23 °C / +73.4 °F with a steel pipe according to DIN EN 10220, St37 – rolled surface – taking static friction into consideration.

### Standard Series (DIN 3015, Part 1)

#### Clamp Bodies (Polypropylene / Polyamide)

Group STAUFF	DIN	Quantity per Bag (in Pcs.)	0
1 - 6	0 - 6	25	3
7 + 8	7 + 8	10	1

#### **Clamp Bodies** (Aluminium)

Group		Quantity per Bag
STAUFF	DIN	(in Pcs.)
1 - 5	0 - 5	25
6	6	10

#### Weld Plates (Type SP) Cover Plates (Type DP)

Group STAUFF	DIN	Quantity per Bag (in Pcs.)
1 - 6	0 - 6	25
7 + 8	7 + 8	10

#### Hexagon Rail Nut (Type SM) Channel Rail Adaptor (Type CRA)

- 8	Group STAUFF	DIN	Quantity per Bag (in Pcs.)
	1 - 8	0 - 8	50

### Heavy Series (DIN 3015, Part 2)

#### Clamp Bodies (Polypropylene / Polyamide)

Group		Quantity per Bag
STAUFF	DIN	(in Pcs.)
3S - 6S	1 - 4	20
7S	5	10
8S - 12S	6 - 10	1

#### Clamp Bodies (Aluminium)

Group		Quantity per Bag
STAUFF	DIN	(in Pcs.)
3S - 6S	1 - 4	20
7S	5	10
8S - 12S	6 - 10	1

### Weld Plates (Type SPAL) Cover Plates (Type DPAL)

Group		Quantity per Bag
STAUFF	DIN	(in Pcs.)
3S - 6S	1 - 4	20
7S	5	10
8S - 12S	6 - 10	1

### Mounting Rail Nut (Type GMV) Channel Rail Adaptor (Type CRA)

Group STAUFF	DIN	Quantity per Bag (in Pcs.)
3S - 6S	1 - 4	40

### Twin Series (DIN 3015, Part 3)

**Packaging Units (Selection)** 

Clamp Bodies (Polypropylene / Polyamide)

Group STAUFF	DIN	Quantity per Bag (in Pcs.)
1D - 4D	1 - 4	25
5D	5	10

#### Weld Plates (Type SP) Cover Plates (Type GD)

### Group Quantity per Bac

STAUFF	DIN	(in Pcs.)
1D - 4D	1 - 4	25
5D	5	10

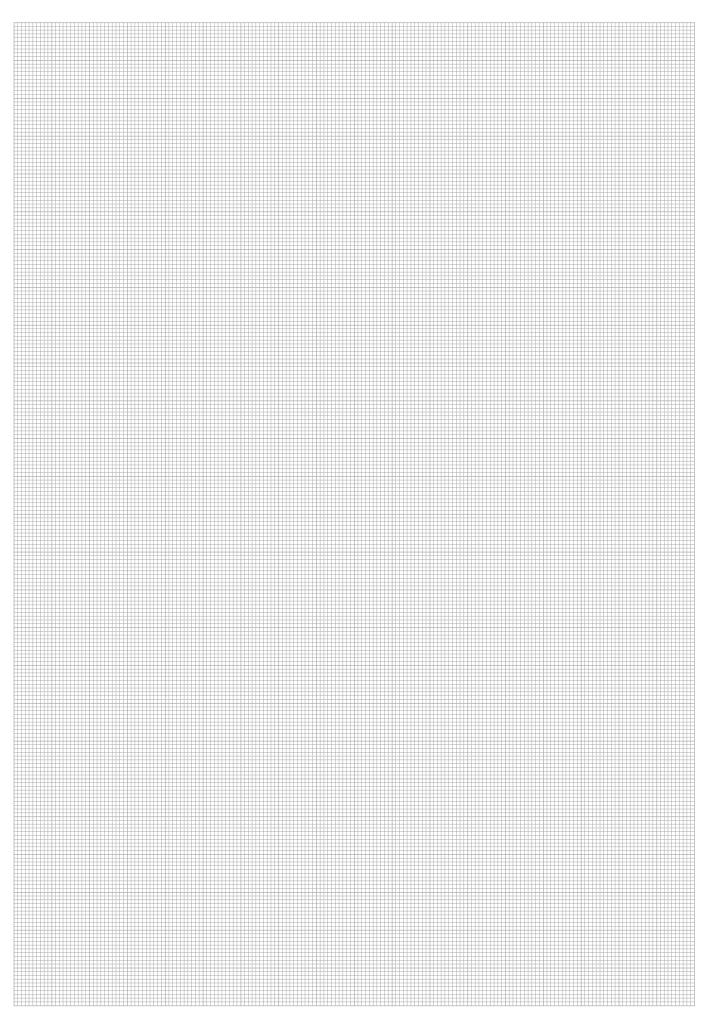

#### Hexagon Rail Nut (Type SM) Channel Rail Adaptor (Type CRA)

Group STAUFF	DIN	Quantity per Bag (in Pcs.)
1D	1	50
2D - 5D	2 - 5	25
